

## AQUACULTURE MAINTENANCE & CLEANING SERVICES

At MP Service Group we have developed a specialized division dedicated to the inland Aquaculture industry, especially those using RAS systems.

We currently provide our services to several fish farms across the United States, including one of the largest Salmon RAS farms in the country.

Our operators are OSHA certified 10 & 30, CPR and First Aid Certified.

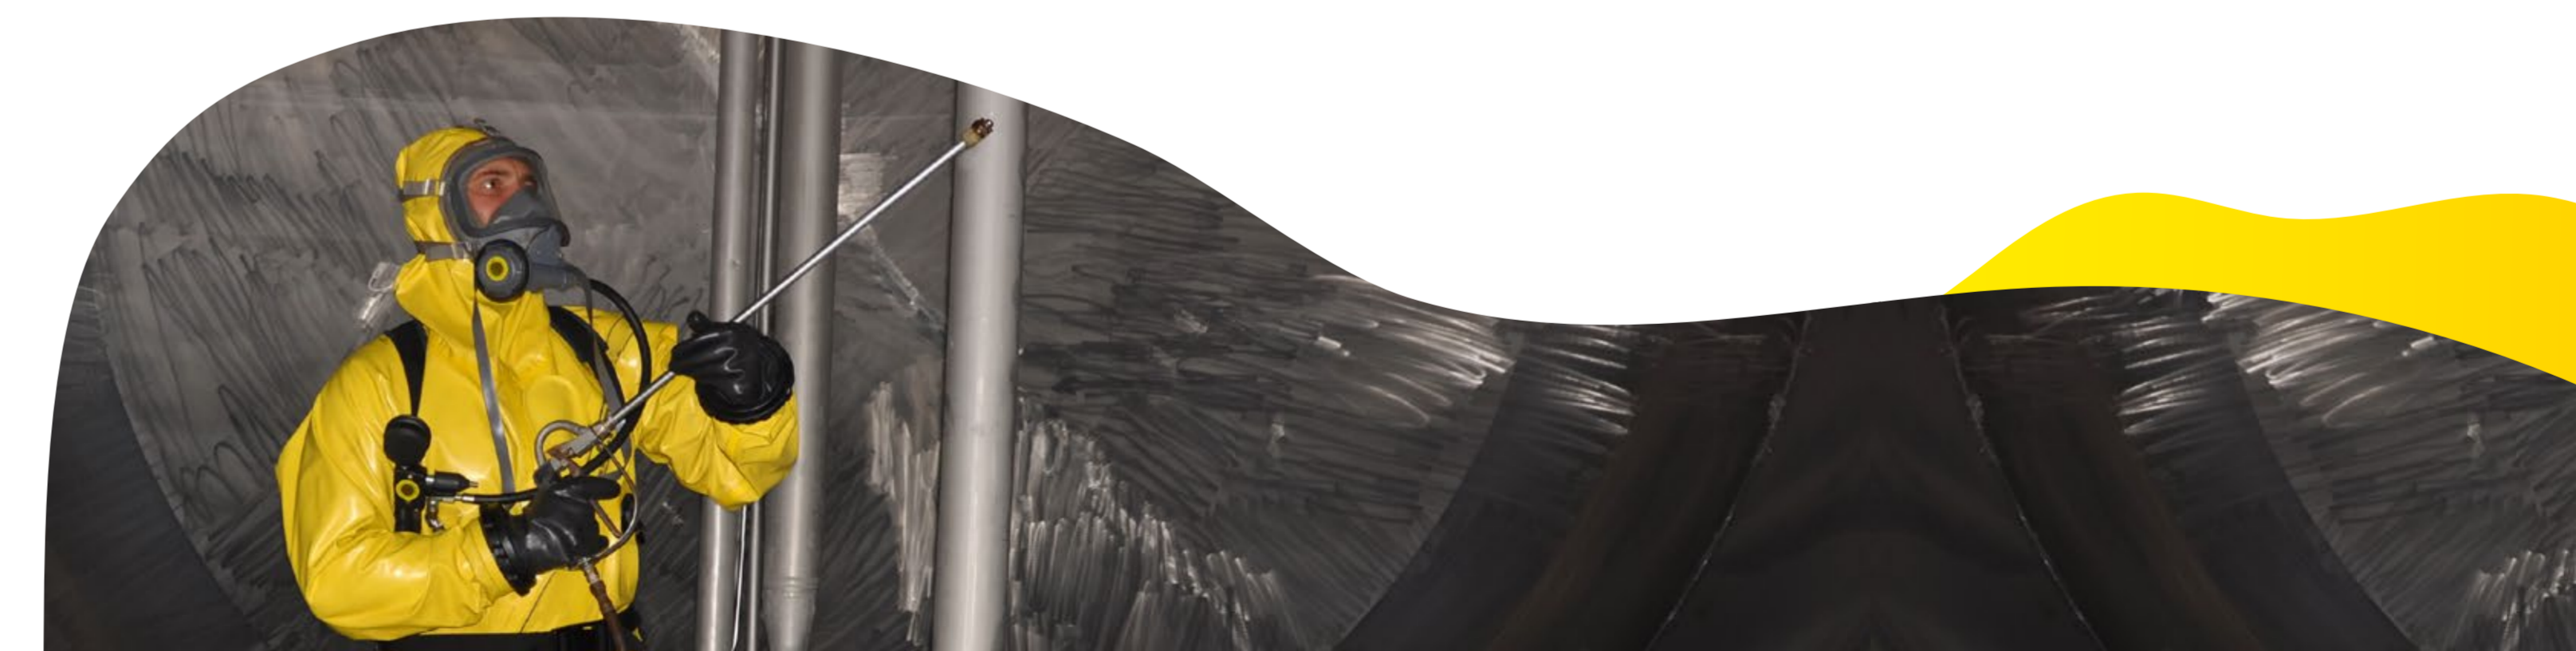

We provide services 24/7

We supply all the equipment necessary to get the job done right. Only using cutting edge technology. That means that we can work in confined spaces and count with individual gas monitors for several types of gases, and oxygen and respiratory aids to work in rarefied atmospheres.

### SOME OF THE SERVICES WE PROVIDE ARE:

- General cleaning and sanitization
- Mortalities handling (**removal and clean up**)
- Entire Buffer Tank cleaning
- Tank clean up
- Trickling cleaning, assembly and disassembly
- In water submarine inspections (**submersible robot**)
